JOURNAL OF Inorganic Biochemistry

Subject Index of Volume 75

Absorption
dietary minerals in the gastrointestinal tract: hydroxypolymerisation of aluminium is regulated by luminal mucins, 167
Acetohydroxamic acid
complexation of beryllium(II) with hydroxamic acids in aqueous medium; spectrophotometric determination of stability constants, 85
N-Acetylmicroperoxidase-11
hemepeptide models for hemoproteins: the behavior of *N*-acetylmicroperoxidase-11 in aqueous solution, 281
Alkaline phosphatase activity
interactions of vanadyl(IV) with dithiothreitol and thioglycolic acid. Their action on alkaline phosphatase activity, 99
Aluminum
aluminum speciation studies in biological fluids. Part 5. A quantitative investigation of Al(III) complex equilibria with desferrioxamine, 2,3-dihydroxybenzoic acid, Tiron, CP20 (L1), and CP94 under physiological conditions, and computer-aided assessment of the aluminum-mobilizing capacities of these ligands in vivo, 27
dietary minerals in the gastrointestinal tract: hydroxypolymerisation of aluminium is regulated by luminal mucins, 167
interactions of $Al(acac)_3$ with cell membranes and model phospholipid bilayers, 263
Aluminum excretion
aluminum speciation studies in biological fluids. Part 5. A quantitative investigation of Al(III) complex equilibria with desferrioxamine, 2,3-dihydroxybenzoic acid, Tiron, CP20 (L1), and CP94 under physiological conditions, and computer-aided assessment of the aluminum-mobilizing capacities of these ligands in vivo, 27
Aluminum mobilization
aluminum speciation studies in biological fluids. Part 5. A quantitative investigation of Al(III) complex equilibria with desferrioxamine, 2,3-dihydroxybenzoic acid, Tiron, CP20 (L1), and CP94 under physiological conditions, and computer-aided assessment of the aluminum-mobilizing capacities of these ligands in vivo, 27
Amino acids
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
Anthracycline
how Fe^{3+} binds anthracycline antitumor compounds. The myth and the reality of a chemical sphinx, 105
Antifungal activity
chloride and ethyl ester morpholine thiourea derivatives and their Ni(II) complexes. Crystal and molecular structures of the thiourea derivative L-leucine methyl ester and its complexes with Cu(II) and Pt(II). Growth of the pathogenic fungus *Botrytis cinerea*, 181
Antimicrobial activity
antimicrobial and mutagenic activity of some carbono- and thiocarbonohydrazone ligands and their copper(II), iron(II) and zinc(II) complexes, 123
Antitumor compounds
how Fe^{3+} binds anthracycline antitumor compounds. The myth and the reality of a chemical sphinx, 105
Apoptosis
synthesis and characterization of complexes of *p*-isopropyl benzaldehyde and methyl 2-pyridyl ketone thiosemicarbazones with Zn(II) and Cd(II) metallic centers. Cytotoxic activity and induction of apoptosis in Pam-*ras* cells, 255
Association constants
the interaction between human and bovine serum albumin and zinc studied by a competitive spectrophotometry, 213

Benzolamide
coordinative versatility of the carbonic anhydrase inhibitor benzolamide in zinc and copper model compounds, 189
Beryllium(II)
complexation of beryllium(II) with hydroxamic acids in aqueous medium; spectrophotometric determination of stability constants, 85
Biological activity
synthesis and spectroscopic properties of copper(II) complexes derived from thiophene-2-carbaldehyde thiosemicarbazone. Structure and biological activity of $[Cu(C_6H_6N_3S_2)_2]$, 45
Bis(2-ethyl-2-pyridyl)amine
syntheses and structures of and catalysis of hydrolysis by Zn(II) complexes of chelating pyridyl donor ligands, 7
Bis-2-picolylamine
syntheses and structures of and catalysis of hydrolysis by Zn(II) complexes of chelating pyridyl donor ligands, 7
Bis[platinum(II)] complexes
bis[platinum(II)] and bis[platinum(IV)] complexes with optically active bis(vicinal-1,2-diamines) and their interaction with DNA, 269
Bis[platinum(IV)] complexes
bis[platinum(II)] and bis[platinum(IV)] complexes with optically active bis(vicinal-1,2-diamines) and their interaction with DNA, 269
Blue copper proteins
^1H NMR of oxidized blue copper proteins, 153
Bovine serum albumin
the interaction between human and bovine serum albumin and zinc studied by a competitive spectrophotometry, 213

Carbonic anhydrase inhibitors
coordinative versatility of the carbonic anhydrase inhibitor benzolamide in zinc and copper model compounds, 189
Catalysis
structure–function correlation of Cu(II)- and Cu(I)-di-Schiff-base complexes during the catalysis of superoxide dismutation, 63
Catalytic dismutation
a study on a novel superoxide dismutase mimic bis(dioxotetraamine) copper(II) complex — kinetics of catalytic dismutation of superoxide anion by pulse radiolysis and solution equilibrium, 1

Elsevier Science Inc.

Circular dichroism
a circular dichroism and fluorescence quenching study of the interactions between rhodium(II) complexes and human serum albumin, 55
kinetic and structural studies of *N*-acetyl-microperoxidase-5 and -micropeoxidase-8, 93
how Fe^{3+} binds anthracycline antitumor compounds. The myth and the reality of a chemical sphinx, 105
Contraceptives
structural and functional characterization of seven spermicidal vanadium(IV) complexes: potentiation of activity by methyl substitution on the cyclopentadienyl rings, 135
Coordination sites on DNA
bis[platinum(II)] and bis[platinum(IV)] complexes with optically active bis(vicinal-1,2-diamines) and their interaction with DNA, 269
Copper
EPR and magnetic susceptibility studies of the trinuclear copper center in native and azide-reacted zucchini ascorbate oxidase, 19
structure–function correlation of Cu(II)- and Cu(I)-di-Schiff-base complexes during the catalysis of superoxide dismutation, 63
^{1}H NMR studies of the reactions of copper(I) and copper(II) with D-penicillamine and glutathione, 117
comparative mechanism and toxicity of tetra- and dithiomolybdates in the removal of copper, 199
Copper complexes
a study on a novel superoxide dismutase mimic bis(dioxotetraamine) copper(II) complex — kinetics of catalytic dismutation of superoxide anion by pulse radiolysis and solution equilibrium, 1
DNA damage by copper(II) complexes: coordination-structural dependence of reactivities, 233
Copper (II) complexes
synthesis and spectroscopic properties of copper(II) complexes derived from thiophene-2-carbaldehyde thiosemicarbazone. Structure and biological activity of $[Cu(C_6H_6N_3S_2)_2]$, 45
CP94
aluminum speciation studies in biological fluids. Part 5. A quantitative investigation of Al(III) complex equilibria with desferrioxamine, 2,3-dihydroxybenzoic acid, Tiron, CP20 (L1), and CP94 under physiological conditions, and computer-aided assessment of the aluminum-mobilizing capacities of these ligands in vivo, 27
Cr(IV)
Cr(IV) causes activation of nuclear transcription factor-κB, DNA strand breaks and dG hydroxylation via free radical reactions, 37
Cr(VI) carcinogenesis
Cr(IV) causes activation of nuclear transcription factor-κB, DNA strand breaks and dG hydroxylation via free radical reactions, 37
Cu(II)
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
Cupredoxins
^{1}H NMR of oxidized blue copper proteins, 153
Cytotoxic activity
structural and cytotoxic study of new Pt(II) and Pd(II) complexes with the bi-heterocyclic ligand mepirizole, 205
synthesis and characterization of complexes of *p*-isopropyl benzaldehyde and methyl 2-pyridyl ketone thiosemicarbazones with Zn(II) and Cd(II) metallic centers. Cytotoxic activity and induction of apoptosis in Pam-*ras* cells, 255
synthesis and characterization of Pd(II) and Pt(II) complexes of *p*-isopropylbenzaldehyde N-protected thiosemicarbazones. Cytotoxic activity against *ras*-transformed cells, 293

Desferrioxamine
aluminum speciation studies in biological fluids. Part 5. A quantitative investigation of Al(III) complex equilibria with desferrioxamine, 2,3-dihydroxybenzoic acid, Tiron, CP20 (L1), and CP94 under physiological conditions, and computer-aided assessment of the aluminum-mobilizing capacities of these ligands in vivo, 27
Desferrioxamine B
complexation of beryllium(II) with hydroxamic acids in aqueous medium; spectrophotometric determination of stability constants, 85
Dietary minerals
dietary minerals in the gastrointestinal tract: hydroxypolymerisation of aluminium is regulated by luminal mucins, 167
Distal histidine (H64)
oxidation of *deoxy* myoglobin by $[Fe(CN)_6]^{3-}$, 241
Dithiothreitol
interactions of vanadyl(IV) with dithiothreitol and thioglycolic acid. Their action on alkaline phosphatase activity, 99
DNA damage
Cr(IV) causes activation of nuclear transcription factor-κB, DNA strand breaks and dG hydroxylation via free radical reactions, 37
DNA damage by copper(II) complexes: coordination-structural dependence of reactivities, 233

EDTA
urinary excretion of essential metals following intravenous calcium disodium edetate: an estimate of free zinc and zinc status in man, 159
Electron paramagnetic resonance
EPR and magnetic susceptibility studies of the trinuclear copper center in native and azide-reacted zucchini ascorbate oxidase, 19
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
oxovanadium(IV) complexes of phosphates of biological relevance: NAD^+, $NADP^+$ and thiamine mono- and diphosphate, 303
Electron spin resonance
structural and functional characterization of seven spermicidal vanadium(IV) complexes: potentiation of activity by methyl substitution on the cyclopentadienyl rings, 135
Electron transport
oxidation of *deoxy* myoglobin by $[Fe(CN)_6]^{3-}$, 241
Erythrocyte membrane
interactions of $Al(acac)_3$ with cell membranes and model phospholipid bilayers, 263

$[Fe(CN)_6]^{3-}$
oxidation of *deoxy* myoglobin by $[Fe(CN)_6]^{3-}$, 241
Fluorescence quenching
a circular dichroism and fluorescence quenching study of the interactions between rhodium(II) complexes and human serum albumin, 55
Formation constants
development of a scale for the comparison of metals in enzyme action, 245
Free radical reactions
Cr(IV) causes activation of nuclear transcription factor-κB, DNA strand breaks and dG hydroxylation via free radical reactions, 37

Gastrointestinal tract
dietary minerals in the gastrointestinal tract: hydroxypolymerisation of aluminium is regulated by luminal mucins, 167
Glutathione
^{1}H NMR studies of the reactions of copper(I) and copper(II) with D-penicillamine and glutathione, 117

Heme model
kinetic and structural studies of *N*-acetyl-microperoxidase-5 and -micropeoxidase-8, 93

Hemepeptide models
hemepeptide models for hemoproteins: the behavior of *N*-acetylmicroperoxidase-11 in aqueous solution, 281
Hemoproteins
hemepeptide models for hemoproteins: the behavior of *N*-acetylmicroperoxidase-11 in aqueous solution, 281
Human serum albumin
a circular dichroism and fluorescence quenching study of the interactions between rhodium(II) complexes and human serum albumin, 55
the interaction between human and bovine serum albumin and zinc studied by a competitive spectrophotometry, 213
Hydrazone complexes
antimicrobial and mutagenic activity of some carbono- and thiocarbonohydrazone ligands and their copper(II), iron(II) and zinc(II) complexes, 123
Hydrolysis
syntheses and structures of and catalysis of hydrolysis by Zn(II) complexes of chelating pyridyl donor ligands, 7
synthesis and hydrolysis of octacalcium phosphate: effect of sodium polyacrylate, 145
Hydropolymerisation
dietary minerals in the gastrointestinal tract: hydroxypolymerisation of aluminium is regulated by luminal mucins, 167
Hydroxyapatite
synthesis and hydrolysis of octacalcium phosphate: effect of sodium polyacrylate, 145
Hydroxyl radicals
DNA damage by copper(II) complexes: coordination-structural dependence of reactivities, 233

Interstrand crosslinks
bis[platinum(II)] and bis[platinum(IV)] complexes with optically active bis(vicinal-1,2-diamines) and their interaction with DNA, 269
Iron
urinary excretion of essential metals following intravenous calcium disodium edetate: an estimate of free zinc and zinc status in man, 159
Iron(III) coordination
how Fe^{3+} binds anthracycline antitumor compounds. The myth and the reality of a chemical sphinx, 105
p-Isopropyl benzaldehyde thiosemicarbazones
synthesis and characterization of complexes of *p*-isopropyl benzaldehyde and methyl 2-pyridyl ketone thiosemicarbazones with Zn(II) and Cd(II) metallic centers. Cytotoxic activity and induction of apoptosis in Pam-*ras* cells, 255

L1
aluminum speciation studies in biological fluids. Part 5. A quantitative investigation of Al(III) complex equilibria with desferrioxamine, 2,3-dihydroxybenzoic acid, Tiron, CP20 (L1), and CP94 under physiological conditions, and computer-aided assessment of the aluminum-mobilizing capacities of these ligands in vivo, 27
Lead
effect of lead, nickel and vanadium contamination on organic acid transport in xylem sap of cucumber, 219
LEC rats
comparative mechanism and toxicity of tetra- and dithiomolybdates in the removal of copper, 199
Luminal mucins
dietary minerals in the gastrointestinal tract: hydroxypolymerisation of aluminium is regulated by luminal mucins, 167

Magnetic susceptibility
EPR and magnetic susceptibility studies of the trinuclear copper center in native and azide-reacted zucchini ascorbate oxidase, 19
Maltol
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
Mepirizole
structural and cytotoxic study of new Pt(II) and Pd(II) complexes with the bi-heterocyclic ligand mepirizole, 205
Metal-activated enzymes
development of a scale for the comparison of metals in enzyme action, 245
Metal complexes
how Fe^{3+} binds anthracycline antitumor compounds. The myth and the reality of a chemical sphinx, 105
coordinative versatility of the carbonic anhydrase inhibitor benzolamide in zinc and copper model compounds, 189
Metallic complexes
stability constants of thiocyanato complexes of cobalt(II), nickel(II) and copper(II) in methanol, 79
Metalloenzymes
development of a scale for the comparison of metals in enzyme action, 245
Methanol
stability constants of thiocyanato complexes of cobalt(II), nickel(II) and copper(II) in methanol, 79
N-Methylacetohydroxamic acid
complexation of beryllium(II) with hydroxamic acids in aqueous medium; spectrophotometric determination of stability constants, 85
Methyl 2-pyridyl ketone thiosemicarbazones
synthesis and characterization of complexes of *p*-isopropyl benzaldehyde and methyl 2-pyridyl ketone thiosemicarbazones with Zn(II) and Cd(II) metallic centers. Cytotoxic activity and induction of apoptosis in Pam-*ras* cells, 255
Microperoxidase
kinetic and structural studies of *N*-acetyl-microperoxidase-5 and -micropeoxidase-8, 93
L-Mimosine
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
Mutagenicity
antimicrobial and mutagenic activity of some carbono- and thiocarbonohydrazone ligands and their copper(II), iron(II) and zinc(II) complexes, 123
Myoglobin
oxidation of *deoxy* myoglobin by $[Fe(CN)_6]^{3-}$, 241

NAD^+
oxovanadium(IV) complexes of phosphates of biological relevance: NAD^+, $NADP^+$ and thiamine mono- and diphosphate, 303
$NADP^+$
oxovanadium(IV) complexes of phosphates of biological relevance: NAD^+, $NADP^+$ and thiamine mono- and diphosphate, 303
Nickel
effect of lead, nickel and vanadium contamination on organic acid transport in xylem sap of cucumber, 219
Ni(II)
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
Ni(II), Cu(II) and Pt(II) complexes
chloride and ethyl ester morpholine thiourea derivatives and their Ni(II) complexes. Crystal and molecular structures of the thiourea derivative L-leucine methyl ester and its complexes with Cu(II) and Pt(II). Growth of the pathogenic fungus *Botrytis cinerea*, 181
NMR spectroscopy
^{1}H NMR studies of the reactions of copper(I) and copper(II) with D-penicillamine and glutathione, 117
^{1}H NMR of oxidized blue copper proteins, 153

Nuclear magnetic spectroscopy
^{31}P NMR, potentiometric and spectrophotometric studies of phytic acid ionization and complexation properties toward Co^{2+}, Ni^{2+}, Cu^{2+}, Zn^{2+} and Cd^{2+}, 71
Nuclear transcription factor
Cr(IV) causes activation of nuclear transcription factor-κB, DNA strand breaks and dG hydroxylation via free radical reactions, 37

Octacalcium phosphate
synthesis and hydrolysis of octacalcium phosphate: effect of sodium polyacrylate, 145
Organic acids
effect of lead, nickel and vanadium contamination on organic acid transport in xylem sap of cucumber, 219

^{31}P
^{31}P NMR, potentiometric and spectrophotometric studies of phytic acid ionization and complexation properties toward Co^{2+}, Ni^{2+}, Cu^{2+}, Zn^{2+} and Cd^{2+}, 71
Pam-*ras* cells
synthesis and characterization of complexes of *p*-isopropyl benzaldehyde and methyl 2-pyridyl ketone thiosemicarbazones with Zn(II) and Cd(II) metallic centers. Cytotoxic activity and induction of apoptosis in Pam-*ras* cells, 255
Pd–mepirizole crystal structure
structural and cytotoxic study of new Pt(II) and Pd(II) complexes with the bi-heterocyclic ligand mepirizole, 205
Pd(II)-bi-heterocyclic complex
structural and cytotoxic study of new Pt(II) and Pd(II) complexes with the bi-heterocyclic ligand mepirizole, 205
Pd(II) complexes
synthesis and characterization of Pd(II) and Pt(II) complexes of *p*-isopropylbenzaldehyde N-protected thiosemicarbazones. Cytotoxic activity against *ras*-transformed cells, 293
D-Penicillamine
^{1}H NMR studies of the reactions of copper(I) and copper(II) with D-penicillamine and glutathione, 117
Peroxidase activity
kinetic and structural studies of *N*-acetyl-microperoxidase-5 and -micropeoxidase-8, 93
Phosphodiesters
syntheses and structures of and catalysis of hydrolysis by Zn(II) complexes of chelating pyridyl donor ligands, 7
Phospholipid bilayer
interactions of $Al(acac)_3$ with cell membranes and model phospholipid bilayers, 263
Phytic acid ionization
^{31}P NMR, potentiometric and spectrophotometric studies of phytic acid ionization and complexation properties toward Co^{2+}, Ni^{2+}, Cu^{2+}, Zn^{2+} and Cd^{2+}, 71
Phytocyanins
^{1}H NMR of oxidized blue copper proteins, 153
Plastocyanins
^{1}H NMR of oxidized blue copper proteins, 153
Potentiometric studies
^{31}P NMR, potentiometric and spectrophotometric studies of phytic acid ionization and complexation properties toward Co^{2+}, Ni^{2+}, Cu^{2+}, Zn^{2+} and Cd^{2+}, 71
Potentiometry
oxovanadium(IV) complexes of phosphates of biological relevance: NAD^+, $NADP^+$ and thiamine mono- and diphosphate, 303
Pt(II)-bi-heterocyclic complex
structural and cytotoxic study of new Pt(II) and Pd(II) complexes with the bi-heterocyclic ligand mepirizole, 205
Pt(II) complexes
synthesis and characterization of Pd(II) and Pt(II) complexes of *p*-isopropylbenzaldehyde N-protected thiosemicarbazones. Cytotoxic activity against *ras*-transformed cells, 293

Pulse radiolysis
a study on a novel superoxide dismutase mimic bis(dioxotetraamine) copper(II) complex — kinetics of catalytic dismutation of superoxide anion by pulse radiolysis and solution equilibrium, 1

Redox mechanisms
oxidation of *deoxy* myoglobin by $[Fe(CN)_6]^{3-}$, 241
Rhodium(II)
a circular dichroism and fluorescence quenching study of the interactions between rhodium(II) complexes and human serum albumin, 55

Schiff base complexes
structure–function correlation of Cu(II)- and Cu(I)-di-Schiff-base complexes during the catalysis of superoxide dismutation, 63
Secondary structures
kinetic and structural studies of *N*-acetyl-microperoxidase-5 and -micropeoxidase-8, 93
Sodium polyacrylate
synthesis and hydrolysis of octacalcium phosphate: effect of sodium polyacrylate, 145
Spectrophotometric studies
^{31}P NMR, potentiometric and spectrophotometric studies of phytic acid ionization and complexation properties toward Co^{2+}, Ni^{2+}, Cu^{2+}, Zn^{2+} and Cd^{2+}, 71
Spectroscopic properties
synthesis and spectroscopic properties of copper(II) complexes derived from thiophene-2-carbaldehyde thiosemicarbazone. Structure and biological activity of $[Cu(C_6H_6N_3S_2)_2]$, 45
Sperm motility
structural and functional characterization of seven spermicidal vanadium(IV) complexes: potentiation of activity by methyl substitution on the cyclopentadienyl rings, 135
Spin trapping
structural and functional characterization of seven spermicidal vanadium(IV) complexes: potentiation of activity by methyl substitution on the cyclopentadienyl rings, 135
Stability
stability constants of thiocyanato complexes of cobalt(II), nickel(II) and copper(II) in methanol, 79
Stability constants
complexation of beryllium(II) with hydroxamic acids in aqueous medium; spectrophotometric determination of stability constants, 85
Structural dependence
DNA damage by copper(II) complexes: coordination-structural dependence of reactivities, 233
Structure–activity relationship
development of a scale for the comparison of metals in enzyme action, 245
Sulfide
comparative mechanism and toxicity of tetra- and dithiomolybdates in the removal of copper, 199
Superoxide dismutase
a study on a novel superoxide dismutase mimic bis(dioxotetraamine) copper(II) complex — kinetics of catalytic dismutation of superoxide anion by pulse radiolysis and solution equilibrium, 1
Superoxide dismutation
structure–function correlation of Cu(II)- and Cu(I)-di-Schiff-base complexes during the catalysis of superoxide dismutation, 63

Tetrathiomolybdate
comparative mechanism and toxicity of tetra- and dithiomolybdates in the removal of copper, 199
Thiamine diphosphate
oxovanadium(IV) complexes of phosphates of biological relevance: NAD^+, $NADP^+$ and thiamine mono- and diphosphate, 303

Thiamine monophosphate
oxovanadium(IV) complexes of phosphates of biological relevance: NAD^+, $NADP^+$ and thiamine mono- and di-phosphate, 303
Thiocyanates
stability constants of thiocyanato complexes of cobalt(II), nickel(II) and copper(II) in methanol, 79
Thioglycolic acid
interactions of vanadyl(IV) with dithiothreitol and thioglycolic acid. Their action on alkaline phosphatase activity, 99
Thiophene-2-carbaldehyde thiosemicarbazone
synthesis and spectroscopic properties of copper(II) complexes derived from thiophene-2-carbaldehyde thiosemicarbazone. Structure and biological activity of $[Cu(C_6H_6N_3S_2)_2]$, 45
Thiosemicarbazones
synthesis and characterization of Pd(II) and Pt(II) complexes of *p*-isopropylbenzaldehyde N-protected thiosemicarbazones. Cytotoxic activity against *ras*-transformed cells, 293
Thiourea derivatives
chloride and ethyl ester morpholine thiourea derivatives and their Ni(II) complexes. Crystal and molecular structures of the thiourea derivative L-leucine methyl ester and its complexes with Cu(II) and Pt(II). Growth of the pathogenic fungus *Botrytis cinerea*, 181

Urinary excretion
urinary excretion of essential metals following intravenous calcium disodium edetate: an estimate of free zinc and zinc status in man, 159

Vanadium
effect of lead, nickel and vanadium contamination on organic acid transport in xylem sap of cucumber, 219
Vanadocene
structural and functional characterization of seven spermicidal vanadium(IV) complexes: potentiation of activity by methyl substitution on the cyclopentadienyl rings, 135
Vanadyl(IV)
interactions of vanadyl(IV) with dithiothreitol and thioglycolic acid. Their action on alkaline phosphatase activity, 99
VO(IV)
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
oxovanadium(IV) complexes of phosphates of biological relevance: NAD^+, $NADP^+$ and thiamine mono- and diphosphate, 303

Wilson disease
^1H NMR studies of the reactions of copper(I) and copper(II) with D-penicillamine and glutathione, 117
comparative mechanism and toxicity of tetra- and dithiomolybdates in the removal of copper, 199

X-ray structures
antimicrobial and mutagenic activity of some carbono- and thiocarbonohydrazone ligands and their copper(II), iron(II) and zinc(II) complexes, 123
Xylem
effect of lead, nickel and vanadium contamination on organic acid transport in xylem sap of cucumber, 219

Zinc
urinary excretion of essential metals following intravenous calcium disodium edetate: an estimate of free zinc and zinc status in man, 159
Zinc(II)–BSA complexes
the interaction between human and bovine serum albumin and zinc studied by a competitive spectrophotometry, 213
Zinc(II)–HSA complexes
the interaction between human and bovine serum albumin and zinc studied by a competitive spectrophotometry, 213
Zinc(II) complexes
syntheses and structures of and catalysis of hydrolysis by Zn(II) complexes of chelating pyridyl donor ligands, 7
Zinc status
urinary excretion of essential metals following intravenous calcium disodium edetate: an estimate of free zinc and zinc status in man, 159
Zn(II)
L-mimosine, an amino acid with maltol-type binding properties toward copper(II), oxovanadium(IV) and other metal ions, 225
Zucchini ascorbate oxidase
EPR and magnetic susceptibility studies of the trinuclear copper center in native and azide-reacted zucchini ascorbate oxidase, 19
